

RegressionRAM::calculateFit

RegressionRAM::getVote

RegressionRAM::train

RegressionRAM::getIndex

```
graph LR; A[RegressionRAM::calculateFit] --> D[RegressionRAM::getIndex]; B[RegressionRAM::getVote] --> D; C[RegressionRAM::train] --> D;
```

The diagram illustrates a dependency or call relationship. Three methods on the left—`RegressionRAM::calculateFit`, `RegressionRAM::getVote`, and `RegressionRAM::train`—are shown in white boxes. Three blue arrows originate from the right side of each of these boxes and point towards a single gray box on the right labeled `RegressionRAM::getIndex`. This suggests that the `getIndex` method is a common target or a shared resource for the other three methods.
